

Amendments to the claims:

This listing of claims replaces all prior versions and listings of the claims in the application.

In the claims:

Please amend the claims as follows:

Listing of Claims:

1. (Currently amended) A system for providing an adaptive Electronic Program Guide (EPG) presentation for use with a receiver for displaying programs from a plurality of program sources on a plurality of user-selectable channels comprising:

an EPG presentation generator for generating a displayable EPG presentation, wherein the EPG presentation can be displayed as a three-dimensionally arranged set of three-dimensional surfaces textured by specially pre-processed scheduling data;

a signal filter ~~that is~~ based on an input provided by a user, wherein the input provided by the user is a request for a the use of a different font type and/or a the use of a different font size and/or a use of a different font style and/or a use of a different background; and

a morphing engine including a database of different EPG presentation solutions, and based on a control command generated by the signal filter, one of said EPG presentation solutions is selected from said database for display.

2-3. (Canceled)

4. (Currently amended) The system according to claim 1 [[3]], wherein the morphing engine comprises a set of parametrical functions, and a control command generated by the signal filter creates a request for a specific function and its parameters.

5. (Currently amended) The system according to claim 1 [[3]], wherein the morphing engine comprises a mix of presentation solutions and functions, and a control command generated by the signal filter creates a request for one of said solutions.

6. (Currently amended) The system according to claim 1 [[3]], wherein the morphing engine comprises a mix of presentation solutions and functions, and a control command generated by the signal filter creates a request for a specific function and its parameters.

7. (Canceled)

8. (Previously presented) The system according to claim 1, further comprising a signal filter that is based on a signal from a broadcaster.

9. (Canceled)
